Beginners Round 6 - 11th to 14th March 2022

Nanro

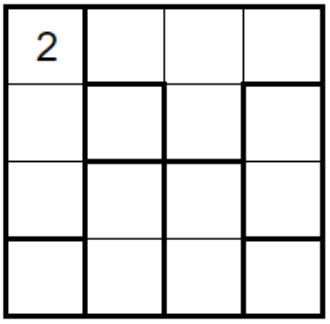

Puzzles by Adam Bissett

Label some cells with numbers to form a single connected group of labelled cells; no 2×2 group of cells may be fully labelled. Each bold region must contain at least one labelled cell. Each number (including any given numbers) must equal the total count of labelled cells in that region. When two numbers are orthogonally adjacent across a region boundary, the numbers must be different.

Time your efforts for each puzzle separately. Then submit your time for each puzzle, and the number of empty cells in each row, as the “answer key”.
